MIKALOR

W3

ASFA High Torque (16 mm) Hose Clamp Stainless Steel W3

Mikalor High-Torque Clamps were designed to guarantee maximum performance in the most demanding applications. Thanks to the use of an M8 screw and the choice of 16mm bandwidth, torque values can be applied which are far higher than those used with the standard ASFA range, thereby ensuring perfect performance in high-pressure applications. The High-Torque clamp is particularly popular in industrial and automotive applications due to its outstanding performance. The perfectly rounded bevelled band edges avoid the clamp cutting into or damaging the hose.

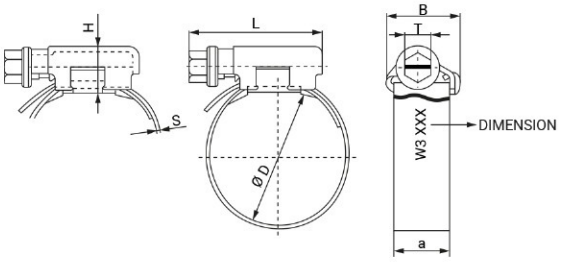

*** The maximum application pressure can vary depending on the type of hose used and the geometry of the coupling.**

*** Fully complies with the SAE J1508 Type HD standard and EU Directive 2002/95/EC.**

								Maximum Values

TECHNICAL INFORMATION	
MATERIAL	Stainless steel band and housing W3 AISI 430 X6Cr17 (DIN 1.4016) Stainless steel screw W4 AISI 304 Cu
CORROSION RESISTANCE	200 hours salt spray (ASTM B-117)
MAX. TIGHTENING SPEED (RPM)	540 ± 5
