ASFA-S Constant Tension Hose Clamp W4 Stainless Steel

Constant Tension clamps, with a 12 mm band width, are primarily designed for use in the automotive sector. Their key advantage lies in the spring-loaded insert, fitted on a semi-circular support to the inside of the band, ensuring consistent clamping force and performance despite variations in temperature, pressure or vibration.

It is mainly used in tubes or hoses carrying hot air or on engine refrigeration systems, as these may contract or expand from their original diameter.

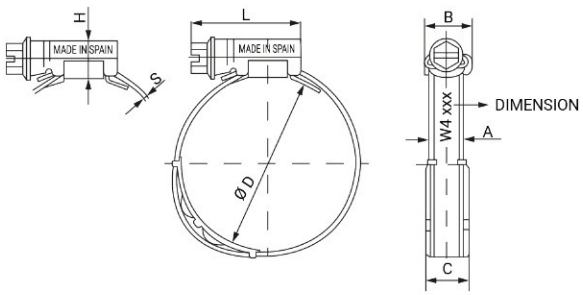

Made from stainless steel, it offers excellent resistance to corrosion.

The entire range is fully compliant with DIN 3017 norm and with RoHs EU Directive 2002/95/EC.
