

FUEL PURIFIER 4000

PRODUCT NUMBER:

FP 4000

PRODUCT DESCRIPTION:

The RCI Technologies patented fuel purifier is a one-step unit that removes up to 99.8% of free water and up to 95% of other heavy contaminants that are found in diesel fuel. Even today's "clean" diesel fuel will easily become contaminated during transportation and storage. Unlike many other products on the market, the RCI Technologies fuel purifier performs this function without the use of a replaceable, changeable, or cleanable filter element or cartridge. By removing contamination immediately before the fuel enters the engine's filter system, you can keep your fuel clean, preserve fuel quality, and extend the life of your equipment.

The FP 4000 is designed for larger diesel fuel pumping and re-fueling stations, fuel transfer docks and marine applications. Holds approximately 7 gallons of water and contaminants, takes approximately 40 seconds to drain completely.

PRODUCT FEATURES:

Product	Universal Fuel Purifier
Model	FP 4000
Nominal Flow	400 GPM (1514 L/min)
In & Out Couplings	4" NPT
Top Port	1" NPT
Sensor Port	1/2" – 20 Straight Thread
Pressure Release Port	1/2" NPT
Safety Feature	Pressure release valve (factory set - 50 PSI)
Drain Port	1" NPT
Height	76.5" (1943.1 mm)
Width	15" (381 mm)
Gross Weight	285 lbs. (incl. mfg. hardware)
Operating Temp	-40° F to 300° F
Sump Capacity	7 gal.
Finish	Polyester Black Powder Coat – 35 to 40 gloss
Options	Water Sensor Kit 1" M-F brass ball valve (drain)
