Stainless steel one ear clip W4

W4

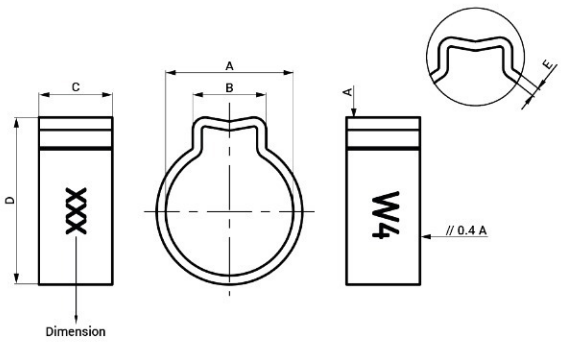

The stainless steel one ear clip is a compact solution with no welds. It is manufactured entirely in AISI-304 stainless steel. It is especially recommended for hose assemblies carrying air or fluids. The edges are rounded to avoid damage to the hose.

These clips are easy, fast and safe to mount. The practical design of ear clips means that you can see at a glance if the clip has been correctly mounted, as it should adapt to the form of the hose or tube and the two sides of the ear should touch.

Ø Application mm	Part Number	A ±0.2	B ±0.2	C ±0.2	D +0.5 -0.2	E +0.1 -0.02	Max. Pressure (Bar)	Box Quantity	Outer Box Quantity
