Competition motivates us to produce our best performance. However, reliable business partnerships that benefit everyone can only be based on fair competition and strict compliance with the law. Every employee is obliged to follow and comply with national and international rules governing fair competition and not to take actions that would be in breach of antitrust law.

Sharing information with other market players is undoubtedly interesting, but always risky.

Agreements with competitors covering factors that relate to competition, such as future prices, capacities and production programs or responses to invitations to tender, are not permitted.

This applies to written agreements and also to the non-binding exchange of verbal information.

BORSERINI SRL succeeds because of the price, performance, quality and suitability of the products and services it offers. We do not give or receive bribes even if this results in a business transaction not taking place. We are restrained and cautious in our approach to gifts, invitations, and other benefits. We do not put our business partners in awkward situations and we do not offer them anything which could be regarded as an attempt to influence their business decisions.

Gifts and invitations that take the form of a friendly gesture can help the business relationship to develop. However, the threshold between permitted behavior and illegal influence is often hard to identify. Misjudgments can have negative consequences for the acting person and for the company. For this reason, BORSERINI SRL has drawn up a set of anti-corruption guidelines which include limits, checklists and approval procedures that provide employees with binding rules for use in their everyday work. If you have questions concerning an individual case, you should contact the Management. Particular care must be taken with public officials. In these cases, you should always ask the Management for advice.

Donations must always be transparent. This means that the recipient and the specific purpose that the donation will be used for must be transparent and documented. In the case of sponsorship, it is important to ensure that the relationship between the financial support and the service provided in return is appropriate and that the sponsorship is in line with the company's principles of Corporate Citizenship. Donations and sponsorship activities are subject to the internal BORSERINI SRL approval guideline.

1.2.3 TRANSPARENT RELATIONSHIPS WITH BUSINESS PARTNERS

Business partners are chosen solely on the basis of competitive considerations and of comprehensive and clearly defined agreements which guarantee appropriate payments and commission. Business partners shall be required to comply with the Code of Conduct.

1.2.4 MEASURES AGAINST MONEY LAUNDERING

The BORSERINI SRL takes all the necessary measures within its sphere of influence to prevent money laundering, i.e., the introduction of the proceeds of criminal activity into the legal financial system with the aim of concealing the true origins of the money.

1.2.5 COMPLIANCE WITH FOREIGN TRADE LAWS

BORSERINI SRL complies with the relevant national and international foreign trade laws for all its deliveries, services, and payments. Breaches of these laws will not only lead to considerable fines, but could also result in a prison sentence for those involved. In addition, the deliveries in question will be stopped and the loss of customs and export privileges could make future deliveries by the BORSERINI SRL more difficult.

Against this background it is important that all employees involved with the import and export of goods and technologies (including technical data), the provision of services and the payment process comply with the relevant sanctions, export and import regulations. This includes in particular following internal company guidelines and processes and consulting the relevant customs and export function within the BORSERINI SRL.

1.3. Avoiding Conflicts of Interest

Situations in which the personal or financial interests of an employee are in conflict with those of the company must be avoided.

BORSERINI SRL is aware of the importance of information security and data protection to the company and to individual employees and guarantees to provide effective protection in both areas.

Trustworthy and effective cooperation is based on truthful and correct reporting as part of internal and external communications.

In order for BORSERINI SRL to remain competitive, it is essential that internal company matters and sensitive information from business partners and customers is treated as confidential and protected against unauthorized access and loss. The obligation to keep the information confidential shall continue after the end of the working relationship.

It is not only the content of the information that must be protected, but also the details of who supplied it and to whom it refers. The risks involved in using these systems, such as cyber attacks, require every user to make responsible use of information systems and data at BORSERINI SRL and to be aware of the risks associated with the use of external information systems and data.
